

St. Francis' College ***Three Year Accessibility Plan 2019 - 2022***

Introduction

The 'College' refers to all the staff and pupils of the Prep department and Senior School which includes Early Years Foundation stage (EYFS), Pre-prep (Key Stage 1), Prep (Key Stage 2), and Senior School (Key Stages 3-5)

Background

The Equality Act 2010 places duties on schools in relation to, inter alia, current and prospective pupils with disabilities. The Act consolidates previous anti-discrimination laws, for example, the Special Education Needs and Disability Act 2001 and the Disability Discrimination Act 1995. Schools have a duty to prepare an accessibility strategy with the overall objective of increasing the accessibility of schools for pupils with a disability.

The St Francis' College accessibility strategy is a three year plan set out by the Board of Governors for:

- increasing the extent to which pupils with disabilities can participate in the College curriculum;
- improving the physical environment of the College to increase the extent to which pupils with disabilities can take advantage of an education;
- improving the delivery to pupils with disabilities of written information which is provided to pupils who are not disabled. This will be done within a reasonable period of time and in formats which take account of views expressed by the pupils and parents about their preferred means of communication.
- Identify any hazards associated with a particular work environment, facility or activity, which have the potential to cause harm.
- Identify reasonable adjustments within the workplace to reduce any health and safety risk related to a persons' disability

The Plan focuses on the needs of pupils with disabilities even though the school may not have any on roll – in this the College fulfils an anticipatory duty. It links to the College's policies on Disability and Individual Needs.

Under the legislation, discrimination is defined as:

Unjustifiably treating someone less favourably for a reason related to his or her disability. Failing to make reasonable adjustments where any arrangement of physical feature places a person with a disability at a substantial disadvantage.

Disability is broadly defined as follows:

A person has a disability if he or she has a physical or mental impairment that has a substantial and long term adverse effect on his or her ability to carry out normal day-to-day activities.

An impairment is seen to affect normal day-to-day activities if it affects one or more of the following:

Mobility, manual dexterity, physical co-ordination, continence, ability to lift, carry or otherwise move everyday objects, speech, hearing, eyesight, memory, ability to concentrate, learn or understand and perception of physical danger.
